2. RESEARCH METHODOLOGY

2.1 Method of Analysis

In connection with the title of this thesis, “Analysis of Speech Errors in “Talk Indonesia” Program on Metro TV, the writer applied field, internet and library research.

Besides that, the writer did internet and library research as well to support or to find the theories of speech errors. She also collected some written references which are concerned with the topic and used those materials for this thesis. Some references which support the writer in doing this analysis are those written by: Brown, Clark, Fodor, Mc Neil, Sapir, and other references written by E. M. Hatch’s book about psycholinguistics.

2.2 Data Collecting Method

In recording the data needed, the writer downloaded the data form the index of Metro TV’s website. The conversations are broadcasted every Sunday at 9 am – 9.30 am. In this research, the writer learned nine samples which recorded from March 13th until May 22nd, 2011. The writer only analyzed the speech errors made in some part of the program, which is approximately 3 – 4 minutes long of duration.
2.3 Procedure of Analysis

This analysis had been done in some steps. Firstly, the writer read some books about psychology and linguistics. Secondly, the writer read some books and articles from internet about phonological units and rules. Thirdly, the writer recorded a talk show program to support this thesis, and then wrote them into some sheets of papers.

After having gained enough information about the study, the writer began to write chapters after chapters attentively. Finally, the writer did some analysis about the speech errors found in “Talk Indonesia” Program on Metro TV, and followed by making some conclusions.

2.4 Review of Related Literature

In complying this thesis, the writer had consulted some references concerned with the topic to support the idea of the analysis. Those references are:

- Hatch (1983). Psycholinguistics, A Second language Perspective. This book helps the writer know how Psycholinguistics becomes a discipline of knowledge. This book also explains that Psychology and Linguists contribute each other and become Psycholinguistics.

- Clark and Eve V. Clark (1977). Psychology and Language: An Introduction to Psycholinguistics. This book is about Psycholinguistics and The classification of speech errors, which are closely concerned with the topic of this thesis.

- Devito (1984). The Elements of Public Speaking. This book consists of necessary information about public speaking, which is related to the topic of this thesis.

- Uebler (2006). A Speech Classification System. This article helps the writer understand more about the the technique of speech classification and the usage of this technology in a set of scenarios.

- Inayah (2009). An Analysis of Speech Errors on SAS FM Radio Program: A Psycholinguistics approach. This thesis gives the writer some information and references about psycholinguistics, especially about speech productions and speech errors.
- Lumbantobing (2009). Speech errors in interviews of Metro TV’s Indonesia This Morning News Program. This previous thesis helps the writer to get many references of speech errors and know how to make the table of the central analysis of speech errors.
